**2. CITATIONS AND EXPLANATIONS**

Claims 1-19 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest blends of a polyamide with a different silicon-modified polyamide, which are useful in oral care products such as toothbrush bristles. As demonstrated by the information provided in the description at pages 10 and 11, oral care products made from the claimed blends, as compared to conventional nylon polyamides used to make oral care products in the prior art, unexpectedly provide improved antimicrobial activity.

Claims 1-19 meet the criteria set out in PCT Article 33(4); the applicability of the claimed oral care products to the oral care industry is self-evident.
